EasyA Concensus HK Hackathon 2026

Eric Chan

OpenClaw for
Crypto Trading Intellegence
using Coingecko

An AI agent which has access to crypto trading datasets

provides alert monitor, trading momentum scanner and answer pricing data

Dashboard is not feasible to check on phone.

OpenClaw demostrated general public is happy about interact an AI agent through mobile messenger app.

Problem

Crypto trading data is presented as chats via AI agent,

instead of interacting with dashboard.

(echo with a trend talked by one of the Concensus stage speaker).

Solution

Based on HKUDS/nanobot, which is a lightweight version of OpenClaw / Moltbot.

Wrapped functionalities in subagents, methodologies in agent skills.
